Bilateral Trigger Diacs

HT and ST Series

General Description

Teccor's "HT" and "ST" Series of bilateral trigger diacs offers a range of voltage characteristics from 27 to 70 volts.

The diac semiconductor is a full-wave or bidirectional thyristor. It is triggered from a blocking-to-conduction state for either polarity of applied voltage whenever the amplitude of applied voltage exceeds the breakover voltage rating of the diac.

The Teccor line of diacs features glass-passivated junctions to ensure long term device reliability and parameter stability. Teccor's glass offers a rugged, reliable barrier against junction contamination.

The diac specifications listed in this data sheet are for standard products. Special parameter selections such as close tolerance voltage symmetry are available. Please consult the factory for more information for custom design applications. Suffix RP signifies tape-and-reel packing. Example: HT32RP.

Features

- **Glass passivated junctions**
- **Wide voltage range selections**

"ST" Series

- **Epoxy SMT package**
- **High temperature solder bonded die attachment**

"HT" Series

- **DO-35 trigger package**
- **Pre-tinned leads**

General Notes

- Lead solder temperature is +230°C max. for 10 seconds max.; ≥ 1/16" (1.59mm) from case.
- See “Package Dimensions” section of this catalog.

Electrical Specification Notes

(1) Breakover Voltage symmetry as close as 1.0V is available from factory on these products.

(2) See Figures 8.4 and 8.5 for Test Circuit and waveforms.

(3) Typical switching time is 900 nano-seconds measured at I_{PK} (see Figure 8.4) across a 20Ω resistor (see Figure 8.5). Switching time defined as rise time of I_{PK} between the 10% to 90% points.

(4) See Figure 8.7.

Bilateral Trigger DIAC Specifications

- Maximum Ratings, Absolute-Maximum Values

  Maximum Trigger Firing Capacitance: 0.1µF
  Device Dissipation (at T_A = -40° to +40°C): 250mW for DO-35 and 300mW for DO-214AA
  Derate Above +40°C: 3.6mW/°C for DO-35 and 3mW/°C for DO-214AA

- Temperature Ranges

  Storage: -40°C to +125°C
  Operating (Junction): -40°C to +125°C
