

General Description:

Schottky Barrier Diodes make use of the rectification effect of a metal to silicon barrier. They are ideally suited for high frequency rectification in switching regulators & converters. This device offers a low forward voltage performance in a power surface mount package in applications where size and weight are critical.

Features:

- Compact surface mount package with J-bend leads (SMC).
- 3.0 Watt Power Dissipation package.
- 3.0 Ampere, forward voltage less than 525 mv

Ordering:

- 13 inch reel (330 mm); 16 mm Tape; 3,000 units per reel.

Absolute Maximum Ratings* TA = 25°C unless otherwise noted

Parameter	Value	Units
Storage Temperature	-65 to +150	°C
Maximum Junction Temperature	-65 to +125	°C
Repetitive Peak Reverse Voltage (V_{RRM})	40	V
Average Rectified Forward Current ($T_L = 100^\circ\text{C}$)	3.0	A
($T_L = 90^\circ\text{C}$)	4.0	A
Surge Non Repetitive Forward Current (Half wave, single phase, 60 Hz)	80	A
Junction to Case for Thermal Resistance ($R_{\theta JL}$)	11	°C/W

*These ratings are limiting values above which the serviceability of any semiconductor device may be impaired
