Product Description

The AM1 is a general purpose gain block that offers good dynamic range in a low cost surface mount package. The combination of flat IP3 and noise figure performance over frequency makes it attractive for both narrow and broad-band applications. Superior thermal design allows the product to achieve +37 dBm IP3 performance at a mounting temperature of +85°C with an associated MTBF of >100 years³. All devices are 100% RF and DC tested.

Test conditions unless otherwise noted.

1. T = 25°C, Vdd = 4.5 V, Frequency = 800 MHz, 50 Ω system.

2. OIP3 measured with two tones at an output power of 2 dBm/tone separated by 10 MHz. The suppression on the largest IM3 product is used to calculate the OIP3 using a 2:1 slope rule.

3. MTBF calculated with channel temperature at 155°C.

Mounting Configuration

- Notes:
1. Ground vias are critical for thermal and RF grounding considerations.
 2. A minimum of 6 ground vias are required for 14 mil and 28 mil FR4 board.
 3. If your PCB design rules allow, ground vias should be placed under the land pattern for better RF and thermal performance. Otherwise ground vias should be placed as close to land pattern as possible.
 4. Trace width depends on PCB board.
