# DM74ALS1004 Hex Inverting Driver

# **General Description**

These devices contain six independent drivers, each of which performs the logic inverter/complement function.

Note 1: The "Absolute Maximum Ratings" are those values beyond which the safety of the device cannot be guaranteed. The device should not be operated at these limits. The parametric values defined in the Electrical Characteristics tables are not guaranteed at the absolute maximum ratings. The "Recommended Operating Conditions" table will define the conditions for actual device operation.
