## TECHNICAL LITERATURE FOR LASER DIODE

## MODEL No. GH04P21A2GE

30 March 2007

This technical literature is subject to change without notice.

SHARP CORPORATION
ELECTRONIC COMPONENTS GROUP

SPEC.No. **No. LH07309**PAGE **1/3** 

| Product name: L | LASER DIODE |
|-----------------|-------------|
|-----------------|-------------|

Model No. : GH04P21A2GE

- 1. These specification sheets include materials protected under the copyright of Sharp Corporation ("Sharp"). Please do not reproduce or cause anyone to reproduce them without Sharp's consent.
- 2. When using this product, please observe the absolute maximum ratings and the instructions for use outlined in these specification sheets, as well as the precautions mentioned below. Sharp assumes no responsibility for any damage resulting from use of the product which does not comply with the absolute maximum ratings and the instructions included in these specification sheets, and the precautions mentioned below.

(Precautions)

- (1) This products is designed for use in the following application areas;
  - \* OA equipment \* Audio visual equipment \* Home appliance
  - \* Telecommunication equipment (Terminal) \* Measuring equipment
  - \* Tooling machines \* Computers

If the use of the product in the above application areas is for equipment listed in paragraphs (2) or (3), please be sure to observe the precautions given in those respective paragraphs.

(2) Appropriate measures, such as fail-safe design and redundant design considering the safety design of the overall system and equipment, should be taken to ensure reliability and safety when this product is used for equipment which demands high reliability and safety in function and precision, such as;

\* Transportation control and safety equipment (aircraft, train, automobile etc.)

\* Traffic signals \* Gas leakage sensor breakers \* Rescue and security equipment

\* Other safety equipment

(3) Please do not use this product for equipment which require extremely high reliability and safety in function and precision, such as ;

\* Space equipment \* Telecommunication equipment (for trunk lines)

\* Nuclear power control equipment \* Medical equipment

- (4) Please contact and consult with a Sharp sales representative if there are any questions regarding interpretation of the above three paragraphs.
- 3. Please contact and consult with a Sharp sales representative for any questions about this product.

Outline dimensions and Terminal connections

No. LH07309

Note 1) Dimension of the bottom of leads.

Note 2) These dimensions are valid only in the range of  $0 \sim 0.6$ mm below from the reference plane.

Note 3) These dimensions are defined from the imaginary circle which goes through the three points around the stem to the bottom of cut off parts.

Note 4) Please don't connect the lead pin No.2 to the driving circuit.

## GENERAL TOLERANCES $\pm 0$ . 2

UNIT:mm

| No. | Component        | Material            | Finish        |  |  |
|-----|------------------|---------------------|---------------|--|--|
|     | Laser Diode Chip | InAlGaN             | -             |  |  |
|     | Stem             | Fe,Cu               | Gold-plated   |  |  |
|     | Cap              | Kovar               | Nickel-plated |  |  |
|     | Window glass     | Borosilicated glass | -             |  |  |
|     | Lead pins        | Kovar               | Gold-plated   |  |  |

Ratings and characteristics

Absolute Maximum Ratings

(Tc=25 (Note 1))

| Parameter                      | Symbol      | Ratings   | unit      |   |
|--------------------------------|-------------|-----------|-----------|---|
| Optical power output(CW) (No   | Po          | 105       | mW        |   |
| Optical power output(Pulse) (N | Рр          | 210       | mW        |   |
| Reverse voltage                | Laser diode | Vrl       | 2         | V |
| Operatings temperature         | CW (Note 2) | Topc(c)   | -10 ~ +70 |   |
| (case temp.) Pulse (Note3)     |             | Topp(c)   | -10 ~ +70 |   |
| Storage temperature(case temp  | Tstg        | -40 ~ +85 |           |   |
| Soldering temperature (Note 4) | Tsld        | 300       |           |   |

(Note 1) Tc : Case temperature

(Note 2) CW : Continuous Wave Operation

(Note 3) Pulse :Pulse Operation(Pulse Width 50ns Duty:50%)

(Note 4) Soldering position is 1.6mm apart from bottom edge of the case.(Immersion time: 3s)

Electro-optical Characteristics (Note 1) (Tc=25 (Note 2))

| Parar                                     | meter                         | Symbol | Conditions                      | min  | typ | max  | unit  |
|---|-------------------------------|--------|---------------------------------|------|-----|------|-------|
| Threshold current                         |                               | Ith    | -                               | -    | 40  | 60   | mA    |

|   |                               |        |                                 | -3   | 0   | 3    | o     |
| Differential efficiecy                    |                               | d      | 95mW<br>T(105mW) - T(10mW)      | 1.1  | 1.5 | -    | mW/mA |
| Kink<br>(Note 5, Note 6)                  |                               | K-LI   | P1=42mW<br>P2=126mW<br>P3=210mW | -10  | -   | 10   | %     |

(Note 1) Initial value, Continuous Wave Operation.

(Note 2) Tc: Case temperature

(Note 3) Angle of 50% peak intensity.(Full angle at half-maximum)

(Note 4) Paralel to the junction plane.(X-Z plane)

Perpendicular to the junction plane.(Y-Z plane)

(Note 5) Pulse :Pulse Operation(Pulse Width 50ns Duty:50%)

(Note 6) Definition of Kink

Kink: K-LI=(P4-P3)/P3
