4-bit magnitude comparator

HEF4585B MSI

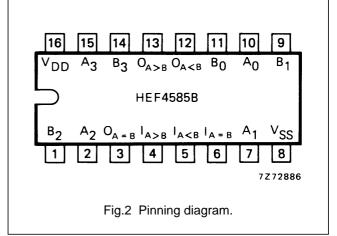

DESCRIPTION

The HEF4585B is a 4-bit magnitude comparator which compares two 4-bit words (A and B), whether they are 'less than', 'equal to', or 'greater than'. Each word has four parallel inputs (A $_0$ to A $_3$ and B $_0$ to B $_3$); A $_3$ and B $_3$ being the most significant inputs. Three outputs are provided; A greater than B (O $_A$ > $_B$), A less than B (O $_A$ < $_B$) and A equal to B (O $_A$ = $_B$). Three expander inputs (I $_A$ > $_B$, I $_A$ < $_B$ and I $_A$ = $_B$) allow cascading of the devices without external gates.

For proper compare operation the expander inputs to the least significant position must be connected as follows: $I_{A=B}=I_{A>B}=HIGH, I_{A<B}=LOW.$ For words greater than 4-bits, units can be cascaded by connecting outputs $O_{A<B}$ and $O_{A=B}$ to the corresponding inputs of the next significant comparator (input $I_{A>B}$ is connected to a HIGH).

Operation is not restricted to binary codes, the devices will work with any monotonic code. The function table describes the operation of the device under all possible logic conditions.

HEF4585BP(N): 16-lead DIL; plastic (SOT38-1)

HEF4585BD(F): 16-lead DIL; ceramic (cerdip) (SOT74)

HEF4585BT(D): 16-lead SO; plastic (SOT109-1)

(): Package Designator North America

PINNING

 A_0 to A_3 word A parallel inputs B_0 to B_3 word B parallel inputs $I_{A > B}$, $I_{A < B}$, $I_{A = B}$ expander inputs $O_{A > B}$ A greater than B output $O_{A < B}$ A less than B output

 $O_{A < B}$ A less than B output $O_{A = B}$ A equal to B output

Notes

L = LOW state (the less positive voltage)

X = state is immaterial

The upper 11 lines describe the normal operation under all conditions that will occur in a single device or in a serial expansion scheme.

The lower 2 lines describe the operation under abnormal conditions on the cascading inputs. These conditions occur when the parallel expansion technique is used.

^{1.} H = HIGH state (the more positive voltage)

APPLICATION INFORMATION

Some examples of applications for the HEF4585B are:

- Process controllers.
- Servo-motor control.
