Miniature Waterproof Plastic Connectors

HR30 Series

Mated dimensions

■ Features

1. Small size

Short in length when fully terminated and mated.

2. Water and dust protected

IP67 protection rating: Complete protection against dust penetration and against water penetration when submerged 1 meter deep for half hour. Mated with corresponding connector or protective cap.

3. Simple pull lock release

Built-in lock/release mechanism securely locks mated connectors while allowing quick disconnection by simply pulling on the plug's release collar. Molded-in grooves prevent hand slippage when pulled.

The round configuration of the collar allows easy side-by-side panel mounting and will not snag on objects when the cable is pulled-out.

4. Light weight, corrosion resistant

Glass reinforced thermoplastic compounds and non-corrosive components are used in all assemblies.

5. Contact protection and self-alignment

Multiple polarizing keys protect the contacts from misalignment or attempted insertion of the wrong connector, while assuring correct mating between the corresponding connectors.

6. Visual alignment indicators

Permanent alignment indicators in a contrasting color on all connectors aid in correct alignment and engagement.

7. Built-in cable strain relief

Lock/release operation

■ Applications

Test and measuring equipment, portable devices, instrumentation, industrial devices, recreational equipment, I/O applications and other applications requiring use of lightweight, corrosion resistant quick mate/ release cable connections.

◆Receptacle, Board Mounting Through Hole Pattern

- Notes
- 1.The receptacle through hole configuration depicts a view from the mating side of the connector.
 - 2.The recommended board maximum thickness :1.2 mm.
 - 3.Tolerance of +0.03 mm is recommended for the plated through hole location.
Tolerance of +0.02 mm is recommended for the plated through hole diameter.

◆Contact Position Arrangement

◆Panel Cutout

	A	B	C	D	Panel Thickness
3,6 pos	1.25	6.45	8.05	3.95	0.7~2
10,12 pos	1.35	9.25	11.05	5.45	0.7~3

- Notes
- 1.The contact configuration depicts a view from the wiring side.
 2. Mounting to the panel is accomplished by tightening the hexagonal nut from the rear side of the panel.

◆ Assembly Procedures

Plug Assembly Sequence

1

	A	B
Solder type : 3 and 6 pos.	2 mm	5.5 mm max.
Solder type : 12 pos.	2 mm	10 mm max.
Crimp type : 10 and 12 pos.	2 ⁰ / _{0.5} mm	15 to 20 mm

Thread the back shell, strain relief, seal bushing, spring and push/pull locking collar over the cable as shown above.

2

Solder type

1. Pre-solder the exposed cable conductors (dia. A). The diameter of the pre-soldered conductors should not exceed 0.7 mm for 6 contact plug and 1.0 mm for 3 contact plug.
2. Insert the insulator body over the applicable solder termination fixture.
3. Insert the pre-soldered conductors in the contact soldering pot and solder them in place.
Soldering iron temperature should be $280 \pm 10^\circ\text{C}$ applied for 3-4 second.

Crimp type

1. Crimp the applicable contact to the stripped conductor. Use correct crimp tools. Verify the dimensions and crimp configuration.
2. Insert the contact into the appropriate opening in the insulator body.
3. Verify fully seated position by applying a slight pull force on the conductor. The contact should remain in place.
Re-insert if not seated.

3

Connector	Back shell tightening collar size	Torque
3 and 6 Pos.	16 mm	0.5N·m
10 and 12 Pos.	18 mm	0.5N·m

1. To prevent accidental loosening of the back shell it is recommended that a small amount of primer (Loctite® 7649) and adhesive (Loctite® 271) be applied to the threads of the insulator body before proceeding.
2. Keeping the terminated insulator body on the fixture, re-assembly the plug in order shown.
4. Using the correct back-tightening collar tighten the back shell to the specified torque.
When tightening the collar make sure that the cable will NOT turn.
5. Remove the assembly from the fixture.

Note: Loctite is a registered trademark of the Henkel Loctite Corporation.

◆ General usage notes

1. Mating	2. Un-mating
<p>When mounting, smooth mating will be achieved by holding plug in any are "A" and aligning the arrow of the plug with that of the receptacle ,then pushing the plug straight in.</p>	<p>When removing the plug from its connected condition, hold the plug by push/pull locking collar (area "B") and pull straight off.</p>

◆ Precautions

1. Do NOT apply force in excess of 30N in the directions shown below.

2. To maintain the water/dust protection performance and the cable clamp force, use a cable that is within the range of applicable cable diameter.
3. Consult HRS representative when using different cables.
