Notes:

1. Operating Temperature: -55 °C to +85 °C, Storage Temperature: -55 °C to +95 °C.
2. Applications: Indoor, 0-95%RH.
3. Forward power is tested with the output VSWR 1.5:1 of the loads. The power handling will be cut down when the output port connect with a high VSWR. Ensure the output VSWR<1.5, avoiding output port open or short.
4. The power handling capability is 10 watts when used as divider with the load VSWR<1.2, the power handling down to 2 watts when used as combiner.
5. Ensure connectors to be in flat connection with outer connectors; suggest using a torque wrench.
6. Custom Designs Available
