## Description

The MASWSS0169 is a GaAs MMIC SPDT switch in a lead-free MSOP-10 surface mount plastic package. This part is ideal for high isolation, broadband switching requirements. Typical applications include synthesizer switching, transmit/receive switching, switch matrices and filter banks in systems such as radio and cellular equipment, PCM, GPS, and fiber optic modules.

The MASWSS0169 is fabricated as a monolithic GaAs MMIC using a 0.5 micron pHEMT process. The process features full passivation.
