

3·1/2 DIGIT SINGLE CHIP A/D CONVERTER

■ GENERAL DESCRIPTION

The NJU9201B/9202B are low-power-consumption, high-performance 3·1/2 digit single chip A/D converters containing a voltage reference, oscillator, 3·1/2 digit A/D converter, 7-segment decoder, display driver and control circuits.

The NJU9201B is designed for direct LCD driving and the NJU9202B for direct LED driving.

The NJU9201B/9202B can be operated on simple application circuits as they require only few external components, therefore they are most suited for digital multimeters, digital thermometers and other likes.
