

75 Ohm BNC Male to BNC Male Adapter

RF Adapters Technical Data Sheet

PE9364

Configuration

- BNC Male Connector 1
- BNC Male Connector 2
- 75 Ohms
- Straight Body Geometry

Features

- Max VSWR of 1.5:1 up to 300 MHz
- Gold Plated Brass Contact

Applications

- General Purpose Test

Description

Pasternack's PE9364 75 ohm BNC male to BNC male adapter is part of our full line of RF components available for same-day shipping. Our BNC to BNC adapter has a male to male gender configuration. PE9364 BNC male to BNC male adapter operates to 300 MHz. The Pasternack RF adapter provides good VSWR of 1.5:1 maximum.

RF adapters are often used to enable connections between two connector types that would otherwise not mate. Certain adapter configurations can also be used to protect connectors on expensive equipment where the number of connect/disconnect cycles is high. An RF, microwave or millimeter wave adapter is connected to the equipment, and the commonly changed connection is made with the adapter which can be easily replaced when it wears out after high usage; such adapters are referred to as connector savers. Pasternack also offers bulkhead, panel mount, hermetically sealed, reverse polarity, and isolated ground adapter varieties to serve all of your RF, microwave and millimeter wave needs.
