

PS9000 Series

OEM silicon stainless steel pressure sensor

FEATURES

- 0...5 psi to 0...500 psi gage
-15...15 psi to -15...100 psi gage
0...15 psi to 0...500 psi absolute
- Calibrated and temperature compensated
- Small size
- Field interchangeable
- Reliable semiconductor technology

SERVICE

Pressure inlet: all media compatible with stainless steel 1.4401 (316)⁹

Housing: stainless steel, protection class IP54, according to DIN40050 respectively NEMA4X¹

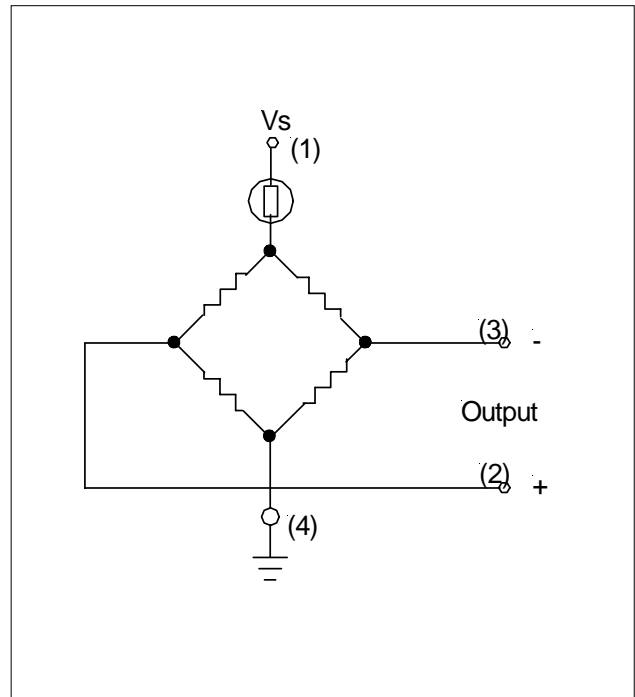

Scale: 1 cm
1 inch

SPECIFICATIONS

Maximum ratings

Supply voltage	15 V
Temperature limits	
Storage	-55°C to 100°C
Operating	-40°C to 100°C
Compensated	0°C to 82°C
Humidity limits	0 - 98 %RH
Vibration (5 Hz to 500 Hz)	10 g _{RMS}
Mechanical shock	50 g for 11 msec
Life	min. 1 million cycles
Insulation resistance at 50 V _{DC}	min. 100 MΩ

Specification notes:

1. IP54 (NEMA4X) protection is given when the connector is locked. For proper function the gage port is vented to the atmosphere through the connector/cable assembly. Thus the cable end must have access to the ambient pressure.
2. The maximum pressure that can be applied without changing the transducer's performance or accuracy.
3. The maximum pressure that can be applied to a transducer without rupture of either the sensing element or transducer case.
4. Span is the algebraic difference between the output voltage at full scale pressure and the output at zero pressure. Span is ratiometric to the supply voltage
5. Linearity is based on **Best fit Straight Line**. Hysteresis is the maximum output difference at any point within the operating pressure range for increasing and decreasing pressure.
6. Maximum error band of the offset voltage or span over the compensated temperature range, relative to the 25°C reading.
7. Long term stability over a one year period.
8. Response time for step change from the zero pressure to the full scale pressure.
9. Other materials on special request. When using devices with optional nickel plated fittings, consider the media compatibility of the fittings also.
