

RLTCO-1064-300W

TECHNICAL DATA

High Power Infrared Diode Pumped Solid State Laser

Features

- Output Power: 300 W
- 1064 nm Emission Wavelength
- Small Size, Compact Package
- Water-Cooled, High Efficiency
- High Beam Quality, Stability and Reliability

Applications

- Metal Sheet Cutting
- Transparent Plastic Welding
- Laser Cleaning
- High-Speed Punching, laser Marking on Titanium Metal

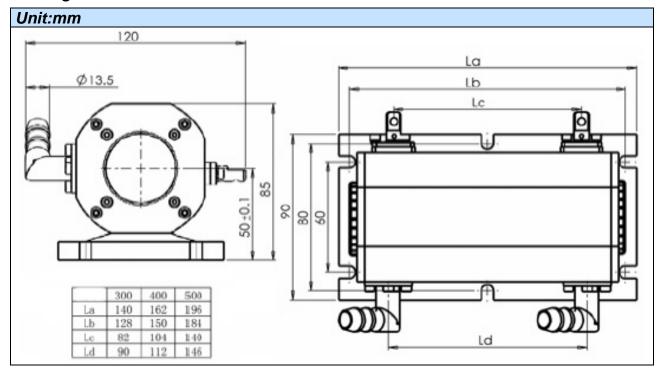

Specifications (25°C)

| Item | Symbol | Value | Unit |
|---------------------------|------------------|-----------------|--------------------|
| Optical Specifications | | | |
| CW Output Power | Po | 300 | W |
| Center Wavelength | λ _C | 1064 | nm |
| YAG Center Height | | 50 | mm |
| YAG Size | | Ø5 x 114 | mm |
| YAG Terminal | | Flat / AR | - |
| Electrical Specifications | | | |
| Threshold Current | I _{TH} | ≤ 10 | A |
| Operating Current | I _{OP} | ≤ 22 | A |
| Structural | | | |
| Size | LxWxH | 140 x 125 x 90 | mm³ |
| Weight | | 2.4 | kg |
| Absolute Maximum Ratings | | | |
| Operating Temperature | T _{OP} | +10 +30 | °C |
| Storage Temperature | T _{STG} | -20 + 70 | °C |
| Cooling Style | | Pure Water | |
| Cooling Water Temperatur | | 20 | °C |
| Cooling Water Flow | | 30 | L/min |
| Cooling Water Pressure | | 3.5 | Kg/cm ² |
| Optical | | 3.6 | KW |

Package Dimensons

Safety of Laser light

Laser Light can damage the human eyes and skin. Do not expose the
eye or skin directly to any laser light and/or through optical lens. When
handling the Lasers, wear appropriate safety glasses to prevent laser
light, even any reflections from entering to the eye. Focused laser
beam through optical instruments will increase the chance of eye
hazard.

These Lasers are emitting invisible light.

Cautions

1. Operating methode

Confirm that electrical spike current generated by switching on and off does not exceed the
maximum operating current level specified herein above as absolute maximum rating. Also,
employ appropriat countermeasures to reduce chattering and/or overshooting in the circuit.

2. Static Electricity

• Static electricity or electrical surges will reduce and degrade the reliability of the LDs. It is recommended to use a wrist trap or anti-electrostatic glove when handeling the product.

3. Absolute Maximum Rating

Active layer of LDs shall have high current density and generate high electric field during its operation. In order to prevent excessive damage, the LD must be operated strictly below absolute maximum rating.

NOTE
