

SMC* SERIES
5.0 thru 170.0
Volts
1500 WATTS

FEATURES

- UNIDIRECTIONAL AND BIDIRECTIONAL
- 1500 WATTS PEAK POWER
- VOLTAGE RANGE: 5.0 TO 170 VOLTS
- LOW INDUCTANCE
- LOW PROFILE PACKAGE FOR SURFACE MOUNTING

This series of TAZ (transient absorption zeners), available in small outline surface mountable packages, is designed to optimize board space. Packaged for use with surface mount technology automated assembly equipment, these parts can be placed on printed circuit boards and ceramic substrates to protect sensitive components from transient voltage damage.

The SMC series, rated for 1500 watts during a one millisecond pulse, can be used to protect sensitive circuits against transients induced by lightning and inductive load switching. With a response time of 1×10^{-12} seconds (theoretical) they are also effective against electrostatic discharge and NEMP.

MAXIMUM RATINGS

1500 watts of Peak Power dissipation ($10 \times 1000 \mu s$)
 $t_{clamping}$ (0 volts to $V_{(BR)}$ min): less than 1×10^{-12} seconds (theoretical)
 Forward surge rating: 200 Amps, 1/120 sec @ 25°C (Excluding Bidirectional)
 Operating and Storage Temperature: -65° to +175°C

NOTE: TAZ is normally selected according to the reverse "Stand Off Voltage" (V_{RM}) which should be equal to or greater than the DC or continuous peak operating voltage level.

DO-215AB

See Page 3-45 for Package Dimensions.

* **NOTE:** All SMC series are equivalent to prior SMM package identifications.

MECHANICAL CHARACTERISTICS

CASE: Molded, surface mountable.
TERMINALS: Gull-wing or C-bend (modified J-bend) leads, tin lead plated.
POLARITY: Cathode indicated by band. No marking on bidirectional devices.
PACKAGING: 16mm tape. (See EIA Std. RS-481.)

THERMAL RESISTANCE: 20°C/W (typical) junction to lead (tab) at mounting plane.

For Bidirectional indicate a C or CA suffix after the part number. (i.e.: SMCJ170CA or SMCJ170C)

Microsemi Corp.'s SMC Series (1500W) surface mountable packages are designed specifically for transient voltage suppression. The wide leads assure a large surface contact for good heat dissipation, and a low resistance path for surge current flow to ground. These high speed transient voltage suppressors can be used to effectively protect sensitive components such as integrated circuits and MOS devices.
