

# TTL-to-DIFFERENTIAL ECL TRANSLATOR

## FEATURES

- 500ps typical propagation delay
- Differential ECL output
- PNP TTL input for minimal loading
- Flow-through pinouts
- Available in 8-pin SOIC package

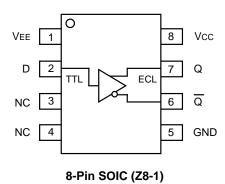

## DESCRIPTION

The SY100ELT24 is a TTL-to-differential ECL translator. Because ECL levels are used, a +5V, -5.2V (or -4.5V) and ground are required. The small outline 8-lead SOIC package and the single gate of the ELT24 makes it ideal for those applications where performance, space and low power are at a premium.

### PIN NAMES

| Pin         | Function                |
|-------------|-------------------------|
| Q, <u>Q</u> | Differential ECL Output |
| D           | TTL Input               |
| Vcc         | Positive Supply         |
| Vee         | Negative Supply         |
| GND         | Ground                  |

## PACKAGE/ORDERING INFORMATION

## Ordering Information<sup>(1)</sup>

| SY100ELT24ZG <sup>(3)</sup>      | Z8-1            | Industrial         | XEL24 with<br>Pb-Free bar-line indicator      | Pb-Free<br>NiPdAu |
| SY100ELT24ZGTR <sup>(2, 3)</sup> | Z8-1            | Industrial         | XEL24 with with<br>Pb-Free bar-line indicator | Pb-Free<br>NiPdAu |

#### Notes:

1. Contact factory for die availability. Dice are guaranteed at  $T_A = 25^{\circ}C$ , DC Electricals only.

2. Tape and Reel.

3. Pb-Free package is recommended for new designs.

## ABSOLUTE MAXIMUM RATINGS<sup>(1)</sup>

| Symbol | Paramter                                      | Value        | Unit |
|--------|---|--------------|------|
| Vcc    | Power Supply Voltage                          | -0.5 to +7.0 | V    |
| Vi     | TTL Input Voltage                             | -0.5 to Vcc  | V    |
| lı     | TTL Input Current                             | -30 to +5.0  | mA   |
| Ιουτ   | ECL Output Current<br>— Continuous<br>— Surge | 50<br>100    | mA   |
| TLEAD  | Lead Temperature<br>(soldering, 20sec.)       | +260         | °C   |
| Tstore | Storage Temperature                           | -65 to +150  | °C   |
| ТА     | Operating Temperature                         | -40 to +85   | °C   |

#### NOTE:

1. Permanent device damage may occur if absolute maximum ratings are exceeded. This is a stress rating only and functional operation is not implied at conditions other than those detailed in the operational sections of this data sheet. Exposure to absolute maximum rating conditions for extended periods may affect device reliability.

## DC ELECTRICAL CHARACTERISTICS
