| $\mathbf{I}_{\mathbf{G T}}$ | 15 | mA |

## DESCRIPTION

The TYNx10 Silicon Controlled Rectifiers is a high performance glass passivated technology.

This general purpose Silicon Controlled Rectifiers is designed for power supply up to 400 Hz on resistive or inductive load.

In order to meet environmental requirements, ST offers these devices in ECOPACK® packages. These packages have a Lead-free second level interconnect. The category of second level interconnect is marked on the package and on the inner box label, in compliance with JEDEC Standard JESD97. The maximum ratings related to soldering conditions are also marked on the inner box label. ECOPACK is an ST trademark. ECOPACK specifications are available at: www.st.com.
