- Note
- The VKC03 series required a minimum 10% loading on the output to maintain specified regulation. Operation under no-load condition will not damage these devices, however they may not meet all listed specification.
  - Simulated source impedance of 12uH. 12uH inductor on series with +Vin.
  - Start up voltage : 10 Vdc
  - The ON/OFF control pin voltage is referenced to negative input.
  - BELLCORE TR-NWT-000332. Case I: 50% Stress, Temperature at 40°C. (Ground fixed and controlled environment)
  - M1 version is more efficient, therefore, it can be operated in a more extensive temperature range than standard.
  - Maximum value at nominal input voltage and full load of standard type.
  - Typical value at nominal input voltage and full load
  - Test by minimum Vin and constant resistor load.
